# Latest UIG volatility

## Key Comments:

- Gas Day 2<sup>nd</sup> May 2018 - The majority of DM Measurements for this gas day were not present in the Gemini system, in time for the first run of Allocation. This resulted in erroneously high Unidentified Gas values across all LDZs. This issue was investigated and resolved in time for the second run of Allocation.
- Gas Day 6<sup>th</sup> May 2018 – NDM Allocation failed to calculate for this gas day on the first run of Allocation, affecting all LDZs. This resulted in erroneously high Unidentified Gas values (c70%) across all LDZs. This issue was investigated and resolved in time for the second run of Allocation.
