

## **Unidentified Gas Update**

April 2025

Dear Customers and Industry Colleagues,

As part of the recent Gemini Sustain Plus implementation one of the enhancements includes the publication of Unidentified Gas (UIG) demand values on the National Gas Transmission Data portal.

The total LDZ UIG demand values are published daily for the D+1 and D+6 Gas Days – i.e. the first UIG Allocation run and 'closed out' UIG Allocation run.

The National Gas Transmission Data portal is available <u>here</u> and UIG demand values can be found in the following location:

"Find Gas Data / Demand / LDZ Actual / UIG" - see example screen snip below:

Gas system status	Gas flow data 🗸	Find gas data	Reports 🗸	API 🗸
FIND GAS TRANSM	IISSION DATA Find and sele items over tir		gas transmission in Great Britain. Choose	a date range to see these data
	pplicable Gas Day Data by publis alues per Gas Day All data	shed date and time	s → 02/04/2025 (	) items selected
Balancing	> Exit Point Actuals	> Î 🗅 DM	> Deman D+1	d, Actual UIG, LDZ(EA),
Calorific Value	> 🕞 LDZ Actual	»	> Deman	d, Actual UIG, LDZ(EA), 🚺
Demand	>> DZ Forecast	> 🕞 🕞 UIG	>> Deman	d, Actual UIG, ), D+1
Entry Capacity Trading Analysis	>	> Demand Act	tual, LDZ (EA), Demani LDZ(EM	d, Actual UIG, ), D+6

## **Unidentified Gas (UIG): Further Information**

For further information please take a look at Xoserve's dedicated web pages relating to Unidentified Gas: <u>Unidentified Gas</u>.
