

DSC Delivery Sub Group

19th May 2025 at 10:30am

Microsoft Teams Meeting

Meeting Summary

Industry Attendees		
NAME	ORGANISATION	INITIALS
Tom Stuart	WWU	TS
Paul Senior	Utilita	PS
Joanne Rush	SSE	JR
Bimalkumar Mondal	UNK	BM
Michelle Brown	Energy Assets	MB
Danny Cortis	EDF	DC
Nik Wills	Stark	NW
Kevin Clark	Utilita	KC
Daniel Kearney	Utilita	DK
Bradley Wood	Centrica	BW
Sally Hardman	SGN	SH

Xoserve/Correlia Attendees	
Paul Orsler	PO – Chair
Karen Gray	KG
James Barlow	JB
Kate Lancaster	KL

Slides available [here](#).

1. General Meeting Administration

1a. Welcome and Introductions

PO started the meeting and informed all attendees that this meeting is being audio recorded for the purpose of producing the summary. PO informed the attendees of the agenda.

1b. Previous DSG Meeting Summary and Action Updates

PO asked for feedback on the summary for the previous Delivery Sub-Group (DSG) occurrence; no comments were received. The summary was approved.

2. Changes in Change Development

2a. New Change Proposals – Initial Overview of the Change

2a.i. XRN 5914 Amend the Code Cut-Off Date to a Rolling Period (Mod 0886)

JB gave an overview of slide 6, noting that this relates to Modification 0886 which changes the code cut-off date (line in the sand), currently locked in at the last April 3 years prior, and this modification changes that to the last 3 years rolling monthly. This is to keep activity around line in the sand smoother for settlement and UIG so this can move along evenly each month. No questions were raised by DSG representatives.

2a.ii. XRN 5922 Shorten the current code cut-off date (or Line in the Sand) from a 3 to 4-year period to a 2 to 3-year period (Mod 0896)

JB gave an overview of slide 7 noting that this is linked to XRN5914 and will look to implement these changes in a similar timeline. Currently there is a 3 year period to the line in the sand, and this changes that period to 2 years. JB pointed out that both Modifications 0886 and 0896 are both authority consent.

For this change, JB highlighted a consideration that if this was proposed to implement in April 2026, this would mean that rather than skipping line in the sand to 2023 it could instead be 2024 which results in a 2-year jump. This could have an impact to activities that usually take place ahead of line in the sand moving to the following year. PO invited comments or questions from any Shipper representatives, no questions were raised by DSG representatives.

2a.iii. XRN 5923 Updates to the suite of Performance Assurance Report Register (PARR)

PO gave an overview of slide 8. This change was requested on behalf of the Performance Assurance Committee (PAC), to support PAC in their role, this change is to progress direction from PAC on improvements and modifications to a suite of reports that PAC are supplied.

Updates on progress of this change will be fed through PAC and DSG. SH queried that the Change is under Service Area 9 and if PAC reporting should come under this area as is PAC ring-fenced funding. PO highlighted that the funding is 100% Shipper for this change, and that CDSP will confirm whether PAC reporting is captured within the scope of DSC Service Area 9 – Customer Reporting.

Action created - DSG_02: Review Service Area details for Performance Assurance Reports (PO)

2aiv. XRN 5924 Physical Information Exchange (PIX) Ongoing Support Options

PO ran over the change details within slide 9, which looks at how customers relying on physical IX equipment can be supported if they have not successfully transferred over to the Cloud IX by the projects target end date (December 2025). PO explained that there are further details for this later in the meeting under the May Change Pack that has been issued and to be discussed later in this meeting under item 2cii.

2b. Change Proposal Initial View Representations – None for this meeting

2c. Undergoing Solution Options Impact Assessment Review

2ci. XRN5569 - Contact Data Provision for IGT Customers

PO gave an overview of slides 15 – 24. PO highlighted the background that CDSP has supported activity that allows capturing of broadcast data from Shippers such as email addresses and phone numbers which are used by DNs and IGTs for planned and unplanned outages/any gas supply issues. This is captured by data flows that allows DNs and IGTs to request this information to support communications with end consumer in particular user cases.

PO ran over the four solution options detailed in the slides including cost estimates, noting that the options assessed all assured that the data would be controlled with automation and delivered through mechanisms recognised as secure to avoid any manual hand offs or errors, as the service needs to be fully auditable. The solution change pack is currently out for consultation until Tuesday 27th May and welcomed views from IGTs.

MB stated that they would take this back to the next IGT Constituency meeting for discussions but no immediate questions for DSG.

2cii. XRN5924 - Physical Information Exchange (PIX) Ongoing Support Options

PO gave an overview of slide 26 – and gave background of the change around a requirement for the CDSP under UNC to provide an Information Exchange (IX) which is critical to the UK Gas market. Currently there are two products, physical and cloud based to achieve this. Physical IX (PIX) is due to end in December 2025 (as recommended by BT that users are switched over by this point). This change looks at support for customers once PIX is out of vendor support, where customers have not transferred to Cloud IX (CIX).

PO ran over the solution option within the slides, and highlighted that the CDSP are requesting feedback from industry on any reasons as to why the proposal may not be sufficient time to support the migration to CIX and feedback from any users who have already migrated to CIX. No questions or comments were raised by DSG representatives.

3. Changes in Detailed Design

3a. Design Considerations – None for this meeting

3b. Requirements Clarification – None for this meeting

4. Major Release Update

4a. February 25 Major Release

PO ran through slide 36, highlighting that this is the final update as the change has now been closed as the close down report has been approved at may ChMC.

4b. June 25 Major Release

PO ran through slide 38, noting that it is tracking green with a go-live date planned for 27/06/25. A Customer Awareness Session is being planned to discuss how CDSP solutions are being delivered in an informative drop-in session format.

JB highlighted that for XRN5846, M and C are the new values being accounted for in the change and that meter assets in MDD with a meter type of M have been updated from U and, as such, their original form exists within central systems. Xoserve will present information on the proposed transition process next month in DSG.

Action created – DSG_03: Update to be provided at June DSG on the transition within XRN5846 (JB)

4c. Minor Release drop 14

PO ran over slide 40, calling it out for DNs and IGTs due to XRN5769 included in this release, confirming that the Release is tracking green and on track to deliver 30/05/25.

5a. Change Pipeline

PO ran over slides 41-45, highlighting that CDSP are looking for next Minor Release candidates. It has been agreed at ChMC that candidates for Nov 25 Major Release were not approved into scope so this is not scheduled to take place. There are a number of candidates for Feb 26 Major Release, detailed in slides. PO noted that details relating to all live DSC Change Proposals and related UNC Modifications are reflected in the Change Delivery and Change Backlog slides, with latest status and updates included for reference. Joanne Rush highlighted that XRN5702 isn't noted with the proposed implementation date of 27/02/26 on the website. No other comments were made by DSG representatives.

Post meeting update – XRN5702 webpage has been updated to reflect implementation date of 27/02/26.

6. AOB

There was no AOB raised within the meeting.

This was the end of Monday 19th May 2025 DSC Delivery Subgroup meeting.

Next Meeting: 23rd June 2025

If you have any questions relating to the above meeting summary, please email uklink@xoserve.com
